Study Review Planning Workbook

Six review worksheets and a deadline-aware time budget planner with explicit unfinished work.

Use your own topics

List the smallest practice outputs you want to complete, with estimated remaining minutes, a priority from 1 to 5, and a deadline expressed as a period number. This product contains no exam question bank or copied course notes.

Count usable minutes

Enter ordered periods and usable minutes after breaks. The tool sorts topics by earliest deadline, then higher priority, then ID, and allocates to the earliest available period before that deadline. This is an explicit planning heuristic.

01 / Topic inventory

Self-owned topic and material
TOP-01: practise joins using my own fictional tables.

Observable practice task
Write one query and explain why a duplicate key changes the row count.

Estimated remaining minutes
40 minutes, as an initial planning estimate rather than a measured learning effect.

Explicit priority and deadline
Priority 4 of 5; finish by practice day 2.
