Offline Unit Price Comparator

Normalise pack quotes by mass, volume or count and export an inspectable ranking.

Enter quoted facts

Enter an ID, pack count, quantity per pack, unit, total quoted price, shipping and discount. The price field is the complete quote before shipping and discount, not the price for one pack. The app does not scrape retail websites.

Keep currency and dimension fixed

Choose one currency and mass, volume or count for the comparison. Grams and kilograms are compatible; millilitres and litres are compatible; pieces and dozen are compatible. A litre cannot be compared with a kilogram without a separate density assumption, which this tool does not invent.

01 / Input record

Purpose
Compare fictional mass-based pack quotes.

Fictional input
Quote A: 2 packs of 500 g, price 20, shipping 2, discount 0. Quote B: 1 pack of 1 kg, price 25, shipping 0, discount 5. Both use CNY.

Units and input scope
Only compare the same currency and dimension. A lower unit price alone does not establish quality or suitability.

Input version
Example version 1; record a new version after changing an input.
